ER-20 Filtered Earplugs

The ER-20s are DIFFERENT than conventional earplugs. They actually reduce the dangerous sound level evenly (using a tuned resonator and acoustic resistor) to preserve the balance. You still hear the blend clearly, "feel" the bass, and are able to distinguish each tone.

Several people benefit from using the ER-20 earplugs...

- Aircraft - crews, passengers, pilots
- Athletics - athletes, coaches, spectators
- Construction - carpenters, equipment operators, steel workers
- Emergency Vehicles - EMT's, highway patrol, firefighters
- Industrial - factory workers, students, supervisors
- Leisure - concerts, night clubs, noisy restaurants, sporting events
- Medical/Dental - dentists, hygienists, technicians, surgeons
- Drivers of - heavy equipment, motorcycles, race cars, pit crews
- Musicians - vocalists, musicians, directors

Profession	ER-9	ER-16	ER-28	ER-4	ER-20	Harmful Sound Comes From:

ER-20 Hi-Fi and Ultra-Tech Earplugs

The ER-20 Hi-Fi and Ultra-Tech earplugs have a triple flange construction and provide an inexpensive, high-fidelity earplug that can be used in a variety of noisy environments. Only difference is that the ER-20 Ultra-Tech comes with a removable, matching colored, retaining cord.

- Low cost
- 20dB attenuation
- Clarity of sound and pitch, music is heard clearly
- Good frequency response accuracy
- Speech is understood more easily in high level noise
- Available in a variety of colors (matching cord sent with Ultra-Tech order)

Baby Blues

Standard

- Translucent Blue Stem with Cord without Cord
- Translucent Red Stem with Cord without Cord
- Translucent Purple Stem with Cord without Cord
- Translucent Beige Stem with Cord without Cord
- Clear Stem with Cord without Cord
